CORE / FINE PORCELAIN STONEWARE MADE IN THE USA.

CORE

The desire to bring an edgy, urban and aesthetically neo-industrial porcelain tile to the table propelled us forward while creating Core.

Concrete is everywhere; we walk, drive and dance on it but seeing it so frequently has erased its significance from our minds.

Although we may love the minimalistic and inner-city look of concrete, the concrete industry is a top contributor of carbon dioxide, a significant greenhouse gas and that does not align with our core values.

A genuine and passionate concern for the world we live in and the way we treat it has always been a major defining characteristic of Florim USA and Milestone.

Core is comprised of 40% recycled content, is made from locally sourced, natural materials and contains no VOCs, PVC or Formaldehyde, commonly found in other flooring options.

Available in four designer colors, Core also includes mosaic and trim options.

UNIFORM APPEARANCE

Differences among pieces from the same production run are minimal.

SLIGHT VARIATION

Clearly distinguishable differences in texture and/or pattern with similar colors.

MODERATE VARIATION

While the colors present on a single piece of tile will be indicative of the colors to be expected on the other tiles, the amount of colors on each piece will vary significantly.

SUBSTANTIAL VARIATION

Random color differences from tile to tile, so that one tile may have totally different colors from that on other tiles. Thus, the final installation will be unique.

Progress that invests in the entire society

As an active member of the U.S Green Building Council, MILE[®]stone spreads awareness to the community and encourages the use of building solutions through environmentally friendly practices.

Our products positively contribute to the requirements for obtaining the LEED (Leadership in Energy and Environmental Design) and WELL (IWBI) certifications.

A commitment to environmental sustainability and responsibility

We are committed to conscious development that minimizes the negative impact of manufacturing production on the environment. Our general approach to sustainability intersects with our business strategy to embrace three areas of responsibility: economic, social, and environmental. Some ways we prove this are:

- Products containing as much as 45% recycled content.
- Post-consumer recycled content levels as much as 3%.
- Zero industrial wastewater discharge.
- A 99% internal process recycling rate.
- Local sourcing of >95% raw materials (within 500-mile radius of factory) resulting in low transportation related carbon emissions.

MILE[®]stone is taking these and other steps, as well as actively investing to reduce carbon emissions to ensure that we reach full carbon neutrality.
